

## Technical Architecture

### Project Design Phase-II Technology Stack (Architecture & Stack)

|                     |  |
|---------------------|--|
| <b>Team ID</b>      | PNT2022TMID36004   |
| <b>Title</b>        | Detecting Parkinson's Disease using Machine Learning                     |
| <b>Team Members</b> | Pradhissha M R<br>Vasanth M<br>Gokul R<br>Kathiresh Praveen S<br>Divya G |

**Table-1: Components & Technologies:**

| S. No | Component              | Description                                     | Technology                              |
|-------|------------------------|---|---|
| 1.    | User Interface feature | How user interacts with application e.g. Web UI | HTML, CSS, JavaScript (Web application) |
| 2.    | Application Logic-1    | Logic for a process in the application          | Python                                  |
| 3.    | Application Logic-2    | Logic for a process in the application          | IBM Watson STT service (Cloud)          |
| 4.    | Application Logic-3    | Logic for a process in the application          | IBM Watson Assistant (Cloud)            |
| 5.    | Database               | Data Type, Configurations etc.                  | MySQL                                   |
| 6.    | Cloud Database         | Database Service on Cloud                       | IBM DB2                                 |

|     |                                 |   |   |
|-----|---------------------------------|---|---|
| 7.  | File Storage                    | File storage requirements                       | Local Filesystem  |
| 8.  | External API                    | Purpose of External API used in the application | Aadhar API  |
| 9.  | Machine Learning Model          | Purpose of Machine Learning Model               | Random Forest classifier (ML), Decision tree classifiers, Support Vector Machines (SVM), Label encoding and One-hot encoding, K Nearest Neighbor (KNN) algorithm, XG boost algorithm(Gradient boosting) |
| 10. | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud  | Local Server Configuration:<br>Local System<br><br>Cloud Server Configuration:<br>IBM Watson (Cloud)  |

**Table-2: Application Characteristics:**

| S. No | Characteristics          | Description   | Technology   |
|-------|--------------------------|---|--|
| 1.    | Open-Source Frameworks   | List the open-source frameworks used  | Numpy, Pandas, metrics, XG boost, Python Flask (Web), Scikit-learn(Sklearn), Tensor flow |
| 2.    | Security Implementations | List all the security / access controls implemented, use of firewalls etc.  | Encryptions, Decryptions   |
| 3.    | Scalable Architecture    | Justify the scalability of architecture (3 – tier, Micro-services)  | MySQL – As it can store huge amount of data  |
| 4.    | Availability             | Justify the availability of application (e.g., use of load balancers, distributed servers etc.)                           | IBM Watson – Can easily be accessed  |
| 5.    | Performance              | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | Flask – Handle multiple requests   |
